

Original DS4 vs DS4 Halo

DeepSeek V4 Flash 0731 · Strix Halo, 128 GB · Recorded September / October campaigns

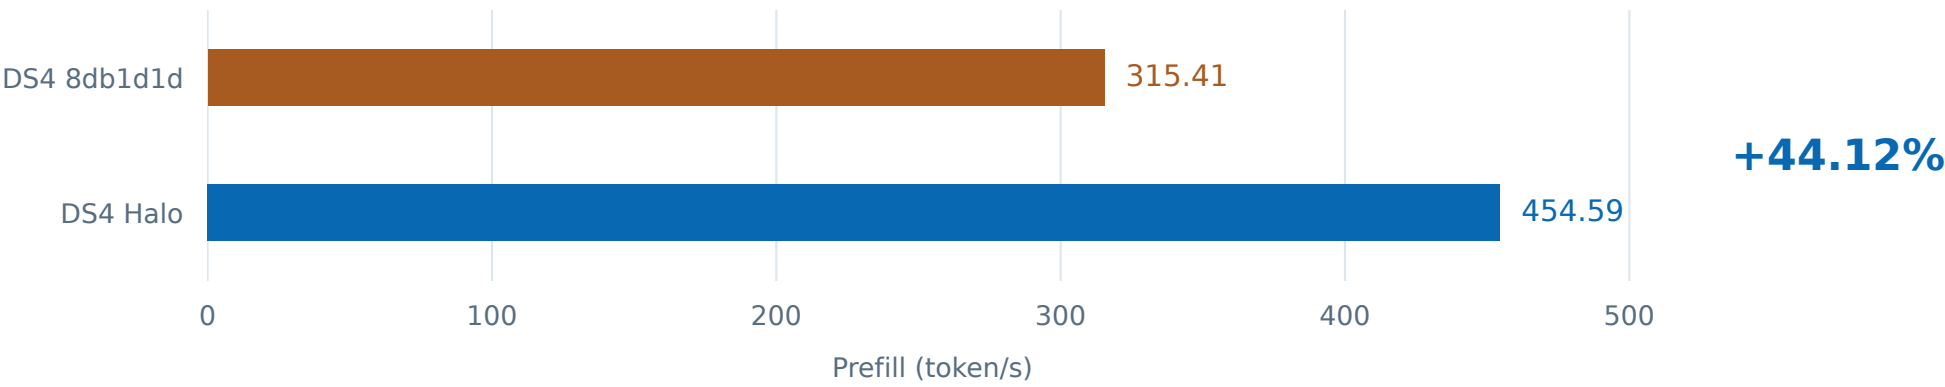

Original DS4: upstream 8db1d1d. Panels separate protocols, dates and the two Strix Halo systems.

Historical incremental prefill · context starts at 2K

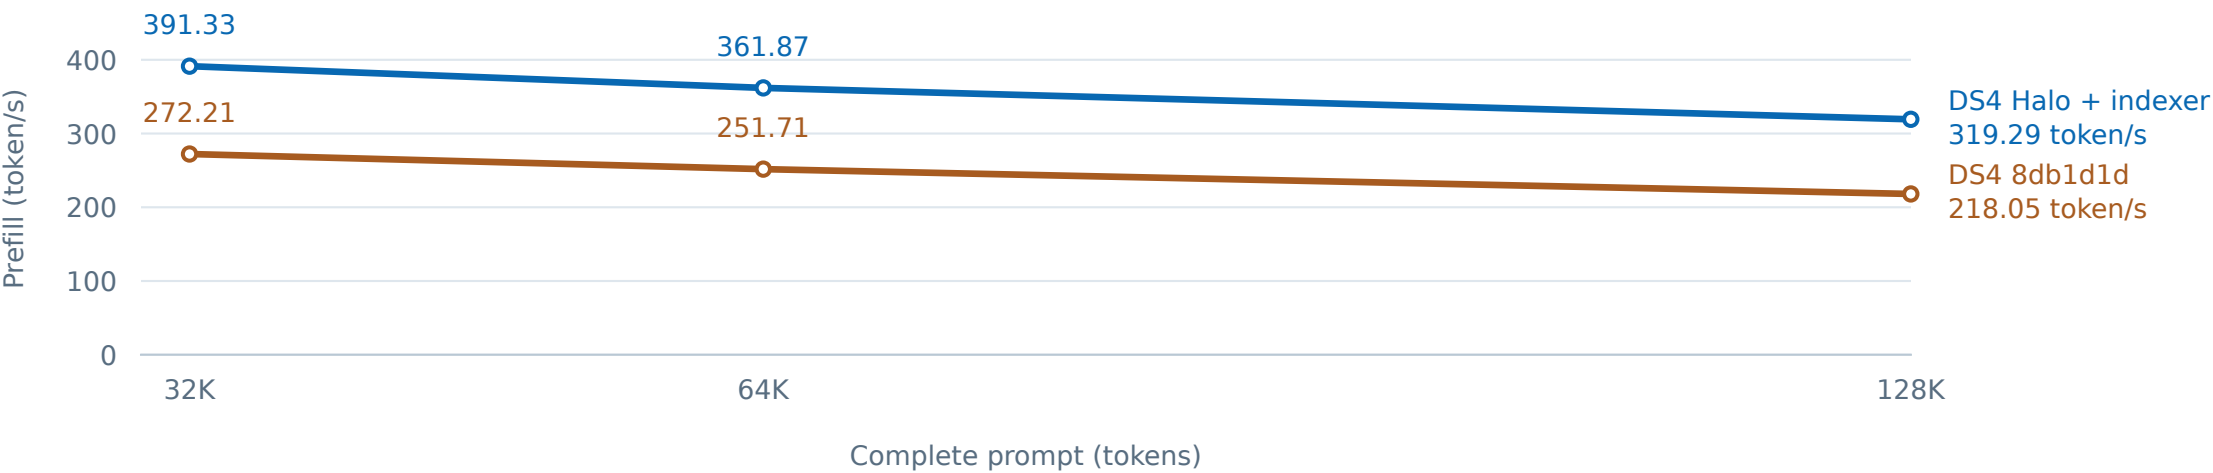

Each interval adds 2,048 tokens; two observations per frontier. Pre-indexer Halo checkpoint.

Latest prepared complete 4K request · October 6 · IOMMU off

Second Halo system: two independent processes per engine, each with 3 pure warmups + 1 sample; generation disabled.

Historical complete first-use prompts · 2K chunks + indexer

Required first-use preparation included; loading excluded. Original DS4 Sep 25, indexer Sep 26; not contemporary A/B.

No line connects different protocols. Full-precision records and source identities accompany the figures. K = 1,024 tokens.
